

BEGÜM EMİR

QA Engineer | Frontend Developer

hello@begumemir.com · linkedin.com/in/begüm-e-4513a3232 · github.com/BegumEmir

SUMMARY

QA Engineer with hands-on experience in manual testing, exploratory testing, and bug reporting. Skilled in Jira-based issue tracking and cross-functional collaboration in Agile environments. A background in frontend development provides additional context when analyzing bugs and communicating findings to development teams.

EXPERIENCE

QA Engineer (Intern → Junior QA Specialist) | Cross4Cloud | Jul 2024 – Nov 2024

- Prepared and executed manual test scenarios for the Cross4Cloud platform across multiple release cycles.
- Actively used Jira for bug tracking, issue management, and detailed reporting.
- Conducted end-to-end exploratory testing across all application pages to identify UX and functional issues.
- Created detailed bug and UX reports with actionable improvement suggestions for the development team.
- Worked closely with developers in an Agile environment to ensure timely resolution of reported issues.

PROJECTS

Smart Learning Platform | Graduation Project — Maltepe University | 2024–2025

- Built a personalized education platform using React.js, Firebase, and Gemini AI.
- Features include a daily spinner, badge system, leaderboard, and subject modules (English, Math, Science).
- Integrated a Gemini-powered AI chatbot offering tailored learning recommendations.
- Developed creative mini-games: Let's Draw, Let's Paint, Let's Pop, and Let's Puzzle.

Kocayayla Cooperative Website (V1 → V2) | Freelance | 2025–2026

- Designed and developed a website for S.S. Kocayayla Köyü Tarımsal Kalkınma Kooperatifi using React and CSS (V1, 2025).
- Set up SEO, Google Analytics, Search Console, Google Maps, and Google Business Profile for local visibility.
- Rebuilt the site from scratch in 2026 (V2) using Vite and Tailwind CSS; integrated Sanity CMS for content management, and added media slider, news popup, and breadcrumb navigation.
- Tech stack: React · Vite · Tailwind CSS · Sanity CMS · React Router · Netlify.

Yaykın Cooperative Website | Freelance | 2026

- Developed a website for S.S. Yaykın Köyü Tarımsal Kalkınma Kooperatifi, a cooperative in the same district as Kocayayla.
- Built on the Kocayayla V2 codebase as a template; redesigned with a distinct brand identity and content.
- Integrated the same stack and third-party services (Sanity CMS, SEO, Google Analytics, Search Console, Google Maps).
- Deployed on Cloudflare Pages for scalability across multiple active projects.
- Tech stack: React · Vite · Tailwind CSS · Sanity CMS · React Router · Cloudflare Pages.

pea-game — Mobile Application | Personal Project | 2025–present

- Built a Tamagotchi-style virtual pet mobile app with React Native, Expo, and TypeScript.
- Features 5 care stats, 7 mood states, sleep system, 5 mini-games, shop, daily quests, and achievement badges.
- Implemented offline energy calculation and push notifications.

QA Automation Project | Personal Project | 2025

- Built a test automation suite using Python, Selenium, and Pytest following Page Object Model (POM) architecture.
- Implemented reusable fixtures and setup methods via conftest.py for clean, maintainable test structure.

SKILLS

QA & Testing	Manual Testing, Test Case Design, Bug Reporting, Exploratory Testing, Regression Testing, Jira
Automation	Selenium, Pytest
Frontend	React, React Native, TypeScript, JavaScript, Expo, Firebase, Tailwind CSS, Sanity CMS
Other	Git, GitHub, VS Code, Netlify, Cloudflare Pages, Vercel, Render
Languages	Turkish (Native), English (Professional)

EDUCATION

- B.Sc. Computer Engineering** | Maltepe University | *Graduated 2025*
- Member & Team Leader, Anka Software Club (2023–2024).
 - Organized software summits hosting professional speakers from the industry.
 - Designed promotional materials using Canva and managed social media content to boost event visibility.
